

OPERATION CONFIRMED CF CARD LIST FOR FOSTEX MODEL FR-2LE (V1.01 software)

2nd Issue (May 10, 2007)

1. OPERATION-CONFIRMED MEDIA

Important Notice

The listed CF cards were confirmed to operate properly with model FR-2LE through our lab tests on the cards Fostex optionally obtained from the market. However, this does not mean all the cards of the same manufacturer and of the same model name / number / same capacity always work properly due to different internal configuration depending on manufacturing time and place. This should not be taken as an evaluation of general quality of each CF card.

Make	Name	Model No.	Cap.	Card Information	Rev.	LINEAR						MP3 192k bps (ST)

C: Confirmed, NG: No good

Depending on the difference of hardware configuration, the same manufacturer's and same model number of CF card with different capacity may not work properly. Card Information and Rev. mentioned above are checked on FR-2. They cannot be currently confirmed on FR-2LE with V1.01 software.

*1: In order to create a WAV (BWF) file with more than 2GB capacity, "4GB" must be selected in the "Max File Size" SETUP menu. The default setting is "2GB".

2. RECORDING TIME CHART

APPROX. MINUTES

Recording Mode	LINEAR						MP3 192k bps (ST)
	Fs (kHz) / Resolution (bits)						
	44.1 16	44.1	48	88.2	96	24	
0.128	12	8	7	4	3	85	
0.256	24	16	14	8	7	173
