

PRELIMINARY INFORMATION

PX-5

Professional Monitor Speaker

To be released in Q1 / 2013

The PX-5 is a professional monitor speaker consisting of 5.2" woofer and 1" tweeter powered by 35W and 18W full digital amplifier for unprecedentedly accurate sound reproduction in this class.

Main Features

- Driven by high quality digital amplifier of 35W(LF) and 18W(HF) output power
- 5.2" Crimson woofer of aramid fiber mixed diaphragm impregnated with resin to enhance fiber bonding for higher rigidity
- 1" Urethane film laminated polyester fiber dome tweeter tuned with back chamber for smooth frequency reproduction
- Digital Network Filter (FIR type) linear phase filtering to realize supreme sound positioning almost identical to a full range driver
- Unique Rotary Encoder plus LED indication with no aging quality deterioration
- 440 step level control by Volume/Trim adjustments
- +/-3dB 0.3dB step tweeter level control and +/-20 step LF roll off frequency adjustment
- Auto Standby / Auto Operation Function for electric power saving
- Fade In function to gradually increase the output level when powering on
- Frequency Response 20Hz to 20kHz (+/-2dB)

*physical design and functions are subject to change.
