

OPERATION CONFIRMED COMPACT FLASH CARD LIST FOR FOSTEX MODEL MR-8 (with V1.21 software)

12th Issue (December 13, 2007)

1. OPERATION CONFIRMED COMPACTFLASH CARDS

Important Notice

The listed CF cards were confirmed to operate properly with model MR-8 through our lab tests on the cards Fostex optionally obtained from the market. However, this does not mean all the cards of the same manufacturer and of the same model name / number / same capacity always work properly due to different internal configuration depending on manufacturing time and place. This should not be taken as an evaluation of general quality of each CF card.

TOSHIBA CF Card *	C	C	C	C	-	TOSHIBA THNCFxxxMMG	V3.10

C: Confirmed, -: Not checked, x: Does not work, **BOLD**: Newly added.

Depending on the difference of hardware configuration, the same manufacturer's and same model number of CF card with different capacity may not work properly.

Card Info can be confirmed on the MR-8 display by pressing "STOP" and "MENU" keys simultaneously and then accessing Service -> Card Info. We only assure the operation of the above CF cards with the corresponding Card Info.

In order to correctly recognize the above CF card, the MR-8 software must be updated to **V1.21** onwards.

* Update the software to **V1.21** at EXTENDED mode. Otherwise, there is a case that the error message (e.g. Error 09, Error 12) is displayed.

2. RECORDING TIME CHART

APPROX. MINUTES

CAPACITY	MONO	2TR	4TR	6TR	8TR
128MB	24 (48)	12 (24)	6 (12)	4 (8)	3 (6)
256MB	48 (96)	24 (48)	12 (24)	8 (16)	6 (12)
512MB	96 (193)	48 (96)	24 (48)	16 (32)	12 (24)
1GB	188 (377)	94 (188)	47 (94)	31 (62)	23 (47)
2GB	377 (755)	188 (377)	94 (188)	62 (125)	47 (94)

*Minutes in parenthesis: extended mode
